COVID-19: Optimizing Healthcare Personal Protective Equipment and Supplies
Webinar Announcement

There has been a large increase in the need for healthcare personal protective equipment (PPE) and specialty supplies due to the COVID-19 pandemic. This increase in demand has led to shortages in PPE and changes in how PPE is used and optimized. ASPR TRACIE, in collaboration with the COVID-19 Healthcare Resilience Working Group, is hosting this webinar to highlight PPE preservation strategies, trends, challenges, and lessons learned/promising practices.

Presenters from the public and private sectors will discuss strategies to optimize the healthcare supply of respirators and PPE, such as implementing crisis capacity strategies, respirator and mask testing programs, disinfection and decontamination procedures, and acquisition and distribution policies. The webinar will take place from 2:30-4:00 PM (ET) on Thursday, September 24, 2020.
