Hospitals are the cornerstones of our communities, and are often their largest employers. Hospital jobs and spending generate additional jobs and spending throughout our state.

Every job in a hospital produces another Connecticut job outside the hospital.

55,000 + 56,000 = 111,000 Connecticut jobs can be traced either directly or indirectly to hospitals.

$11 Billion Annual payroll as a result of these jobs

$8.1 Billion Economic activity generated by hospitals’ purchases of goods and services

$1.1 Billion The amount generated by hospitals’ capital spending

$20.2 Billion The amount Connecticut hospitals contributed to the economy in 2012
